

Liceo delle Scienze Umane, Scienze Applicate, Linguistico

STUDENTS' PRESENTATION

Liceo Scientifico "E. AMALDI"

MEETING 13 -19 DECEMBER 2018 CZECH REPUBLIC

Hi, I'm Marika. I am 17 years old and I live in Modugno. I have one brother and one sister. I attend the fourth year of the high school of human sciences. I have different hobbies: reading drawing and painting. I love being in contact with children, in fact I participated in different voluntary activities. The experience that struck me particularly is the one I lived last summer, together with some friends and educators who are part, with me, of a national association called ACG(Catholic youth action). We went to the region Marche, in some hamlets near Ascoli Piceno, strongly hit by the earthquake of some years ago. We stayed a week, we did different activities with local children and from their stories I could know the reality of those places. It was really nice to see the faces of the children, happy and carefree, despite what they had lived.

Among other hobbies I like listening to pop music and I love travelling. One of the best trip I've done has been in London with some of my classmates.

In the summer, for some years, I have been part of a group of animators organizing workshops and games for children of different age, in the oratory of my church.

ABOUT MYSELF...

My name is Sabrina, I am 17 years old and I'm the last one of three twins. I live in a small town near Bari, but my school is in a village not far away. I'm in the fourth year of high school in the humanities and soon I will have to think about university. When I am not busy with school, between homework or projects, I love thinking about myself. I really like reading books, it is a passion born a few years ago and in this period I really read everything and I discovered my passion for thrillers!

Moreover, being a girl who is forced to move a lot, I spend my time listening to music to start my day in a better way or relaxing a bit.

I am a very active girl with a great desire to do, I love volunteering, I enjoy the idea to help others also in an easy way and share new experiences with people I love.

Last summer, thanks to my educators, I had the possibility to participate in a «work camp» in the region of Marche, in villages in the province of Ascoli Piceno, which, because of a devastating earthquake, do not exist anymore. I helped children play various activities, I listened to their stories, but in particular I saw a reality completely different from mine that I had never imagined.

Another passion that allows me to express myself is theater. I have been acting since I was 14 years old, not in a company and not even in an academy, but I have been lucky to have excellent teachers. With time and practice I have improved, especially in improvisation.

I'm Antonella. I'm 16 years old and I'll be 17 in January. My hometown is Bari, in Apulia - South Italy. Apulia is a wonderful region with a big cultural heritage. I love Italy and I love visiting it and I also love travelling abroad. Infact I visited some European Countries (I've never been in Czech Republic!). My family and I are travellers and I have been travellig since I was a baby. Foreign cultures fascinate me.

In my family we are five people: there is my mom, my dad my two sisters , one older and the other one younger than me.

I'm attending the fourth year of the high school of human sciences.

I like this field of study, but my school is quite demanding. I spend my spare time watching TV series (sometimes also in English), reading books or cooking.

Recently I have joined a theatre group with some friends. As soon as I have my earphones with me I love listening to music. I've also been to a few concerts with my older sister, since we have the same taste in music.

Hello to everybody! I'm Lorenzo. I'm 16 years old and I live in Palo del Colle, a small town near Bari. In my family we are four: my mum, my dad, my older sister and me. I'm attending the third year of the scientific high school. My biggest passion is football in fact I have been playing in a football team since I was six years old. During the week I'm very busy with training and studying until late in the evening. But at the weekend I love going out with my friends to the centre of Bari, going to parties and concerts. My hobbies are listening to pop music, reading, going to the stadium, going to the cinema, watching films, Netflix and playing video-games.

If now I'm here it's because I love the topic of this project and going abroad, in fact last summer I went to London with a famous Italian tour company. It was one of the best experience in my life.

I saw amazing things and knew fantastic friends. I hope I'll say the same for this travel in Czech Republic

Hello to everyone! I'm Domenico, I am sixteen and I live in Palo del Colle, a small town near Bari, in the south of Italy. In my family we are four: me, my mum, my dad and my younger sister.

I attend the Scientific High School "E. Amaldi" in Bitetto, because I am good at Maths and I like scientific subjects. Since I was a child, I've been playing volleyball like setter of my team! In fact I train on Mondays and Wednesdays and I often play matches on Fridays.

In my free time, I like playing video games with my best mates, I usually watch some adventure films and I love reading some interesting fantasy novels. My biggest passion is travelling! I have visited some beautiful cities such as Barcelona, Istanbul, Rome, Athens... I like travelling because I love visiting new places, I love discovering the culture and the history of the countries. I had the opportunity to be here and I am really excited to attend the project "Erasmus 2018/2020" and know new people!
